

## **SportsReach Football League** **Emergency action procedure**

In case of an emergency or serious injury, requiring the attendance of the emergency services, managers are required to have completed this form and have it within at least both the first aid kit and home dressing room, in order to ensure that any emergency can be dealt with quickly and smoothly, whilst ensuring the emergency services attend the correct location. Managers are also required to ensure that players are aware of this form in case of an emergency, especially if it involves the manager.

| First aiders:                             |  |

### **Emergency action procedure:**

- If a player has been seriously injured, ensure someone calls 999 for the emergency services to come.
- Once the emergency services have been called, send one or more players to appropriate locations along the road to signpost for the emergency services to arrive.
- Also ensure that at least one person stays with the injured party at all times.
- With this sheet, there should be a list of emergency contacts for your players. Call the emergency contact for the player to inform them of what has happened to the player.
